

Lab 2: SAMI

Start Assignment

- Due Jun 22 by 9am
- Points 10
- Submitting a file upload
- File Types pdf

Although this document starts from a separate starter document, make sure you've read the [Document Formatting and Submission](https://gatech.instructure.com/courses/552812/pages/document-formatting-and-submission-2) (https://gatech.instructure.com/courses/552812/pages/document-formatting-and-submission-2) page to ensure you are correctly formatting and submitting your document without having to reformat your document prior to submission.

Lab 2: SAMI

Download the following Overleaf starter .zip: [Lab2.zip](https://gatech.instructure.com/courses/552812/files/folder/Starter%20Code?preview=74647311)

(https://gatech.instructure.com/courses/552812/files/folder/Starter%20Code?preview=74647311)

Then, go to www.overleaf.com  (http://www.overleaf.com), log in with your Georgia Tech credentials. Then, click New Project, then Upload Project. Upload Lab2.zip.

Complete the activity as outlined in Lab 2.tex, filling in the relevant sections as you go. Then, export the final lab PDF to submit following the instructions below. Remember, **the directions are in the comments in the .tex file**, not the rendered PDF file; the PDF file solely contains your answers to the prompts.

Please note: Lab assignments are finalized **two weeks** prior to the deadline. Once a link is provided to the starter document above, you may get started; any later changes will have an accompanying announcement, at which point you may download the updated Overleaf file and merge in any changes, using a tool like [Diffchecker](https://www.diffchecker.com/)  (https://www.diffchecker.com/) to highlight what needs to be copied over.

Submission Instructions

For instructions on completing and submitting your document, refer to [Document Formatting and Submission](https://gatech.instructure.com/courses/552812/pages/document-formatting-and-submission-2) (https://gatech.instructure.com/courses/552812/pages/document-formatting-and-submission-2). Most importantly, your assignment must use **Overleaf with the JDF format**, and your submission must include a comment with the **Overleaf edit share link**. Failure to compose your assignment with Overleaf and JDF format, or failure to submit the Overleaf link, will result in a substantial (up to 100%) formatting penalty applied to your overall assignment grade. 

Your submission should be a single PDF; refer to [Document Formatting and Submission](https://gatech.instructure.com/courses/552812/pages/document-formatting-and-submission-2) (https://gatech.instructure.com/courses/552812/pages/document-formatting-and-submission-2) for instructions on how to share videos, interactive demonstrations, or other material that cannot be embedded in the PDF. This content **must** be accessible to anyone with a Georgia Tech account; if any content outside your PDF is not accessible to the instructor and teaching assistants, that content will not be graded.

Participating in peer review is optional but highly encouraged, and is the primary expected way to earn points toward your [class participation grade](https://gatech.instructure.com/courses/552812/assignments/2470892) (https://gatech.instructure.com/courses/552812/assignments/2470892). To

participate in peer review, [submit to the separate peer review assignment](https://gatech.instructure.com/courses/552812/assignments/2481994) (<https://gatech.instructure.com/courses/552812/assignments/2481994>) in Canvas to share your assignment with peers and receive assignments to review in turn. Review the [Primer on Peer Review page](https://gatech.instructure.com/courses/552812/pages/primer-on-peer-review) (<https://gatech.instructure.com/courses/552812/pages/primer-on-peer-review>) for more details.

Late work is not accepted without advanced agreement except in cases of medical or family emergencies. In the case of such an emergency, please [contact the Dean of Students](https://studentlife.gatech.edu/request-assistance) [↗\(https://studentlife.gatech.edu/request-assistance\)](https://studentlife.gatech.edu/request-assistance).

This is an individual assignment. Even if you already plan to work on a team for the project, this assignment should still be completed individually.

Grading Information

Your assignment will be graded on a 100-point scale coinciding with a rubric designed to mirror your successful completion of the steps outlined in the lab above.

Assignment Feedback

For one additional participation point you may also complete the Assignment Survey for this assignment. The assignment survey may be completed *after* you submit the assignment but *within* seven days of the assignment deadline; any submissions outside this time range will be ignored. You may only submit this survey once per assignment; duplicate submissions will be ignored. To complete the CS7637 Assignment Feedback Survey, [click here](https://forms.office.com/r/t2u6KxM3GU) [↗\(https://forms.office.com/r/t2u6KxM3GU\)](https://forms.office.com/r/t2u6KxM3GU).
